

BOARDERA

For PCB Assembly

The Boardera Platform for Assembly pushes the boundaries of automation and drastically changes the way you and your customers do business.

By applying automation and AI techniques, you can onboard projects, procure materials, and provide next-level customer service at a pace only imagined. The product fits perfect with your Advanced Automation & AI objectives.

Quote in Minutes

AI Project File Parsing

Labor & Material Calculations

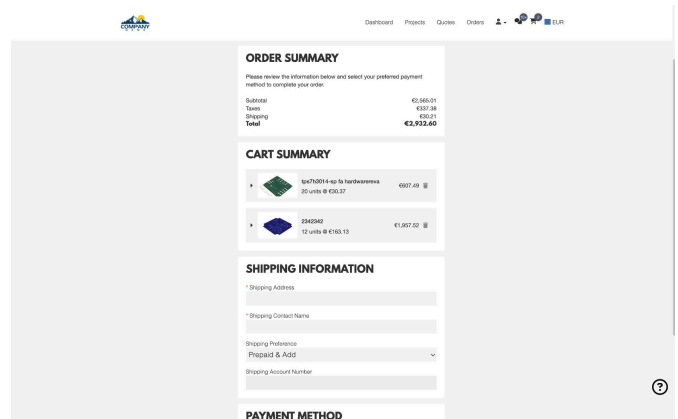

Automated Communications

Save up to 50% on your quoting effort

The Boardera Platform will enhance your customer service and experience while at the same time saving valuable time for the quoting team.

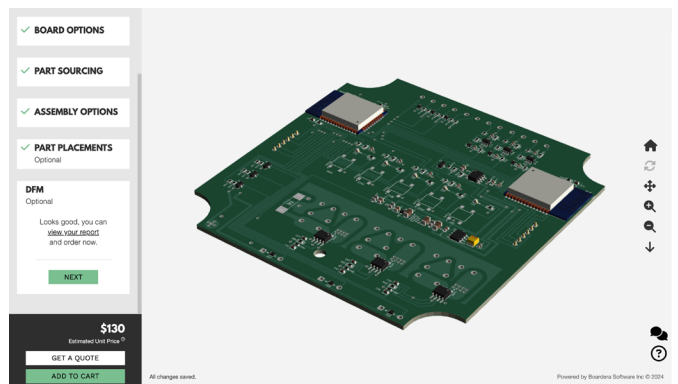

E-Commerce Storefront

We can provide a brandable online storefront which will allow your clients to self-serve their own quotes and order directly from you.

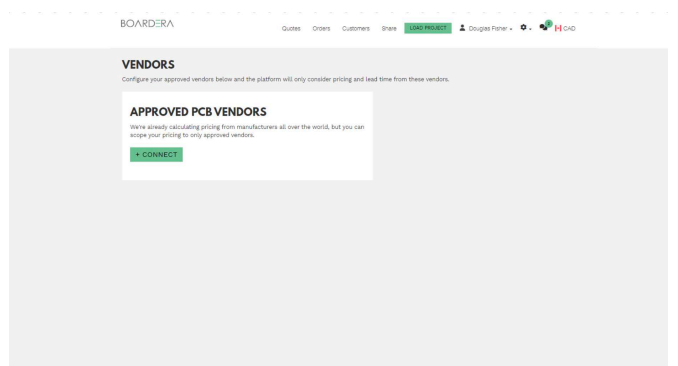

Internal Quoting Module

Leverage the Boardera Platform as an internal quoting tool for your team. Upload a project file to our fully automated quoting tool and receive accurate material, labor, and PCB fabrication pricing.

Approve Vendor List

Automatically get pricing from your preferred PCB Fabricators and component vendors.

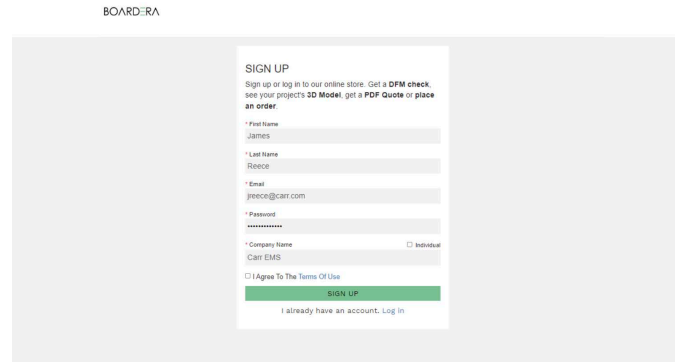

Highly Automated Solution

The Boardera Platform will automate most of your quoting and ordering process, reducing mistakes and time to respond to your customers.

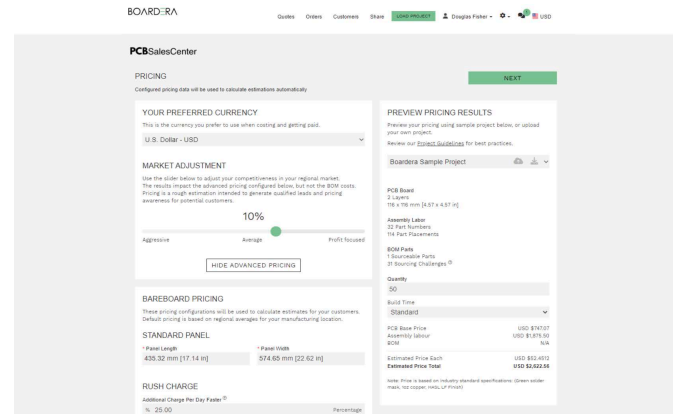

Lead Generation

Leads that come to your website and ask for quotes are now new opportunities for your sales and marketing team to pursue.

Pricing Controls

By analyzing many projects and opportunities, we have created a pricing model that is both considerate of the important details, and simple to set up and maintain.

Automated Pricing

Our software automatically analyzes design details and requirements from the customer's files and automatically applies PCB pricing, labor, component rules, and configurations.

More Orders

The Boardera Platform will free up time to focus on more opportunities and help you to be first to respond to RFQs.

Request for Quotes

The RFQ process is available as a way to handle ill-defined projects, high volumes, or highly complex projects. We will provide the most effective data package you have ever experienced in order to make quick pricing decisions.

Manufacturing Capabilities

We will work with you to add your specific plant capabilities to ensure that your quotes are accurate and that you are receiving orders that you can successfully manufacture.

Messaging Center

Eliminate wasted efforts, inconsistencies, and confusion by allowing important communications to be both automated and captured within the context they apply to.

WORKING DAYS
Select the days of operation in the working week.
* Working Days
M T W T F S S

HOLIDAYS
Add planned holidays for manufacturing. This is used in lead time calculations.
+ ADD NEW

SELF-SERVE ORDERING LIMITS
Use these settings to limit the project complexity that will be automatically priced. Any projects exceeding these limits will automatically enter a 'quote required' state.

MANUFACTURING THROUGHPUT
These settings are per order and are used to calculate the standard lead time.
* Assembled Boards Per Day
